PROFILE

Data & AI Project Manager with over 5 years of experience orchestrating enterprise-grade analytics ecosystems and leading agile transformations. Currently driving the strategic roadmap for Data Analytics Front Ends at Siemens, managing the full lifecycle of platforms including **Airflow, Qlik Cloud, Anaplan, and SAP Analytics Cloud**. Expertise includes leading cross-functional teams (India, Portugal, Germany) to deliver scalable data solutions and integrating **Artificial Intelligence and Model Context Protocols (MCP)** into core business analytics.

PROFESSIONAL EXPERIENCE

Data & AI Project Lead | Visualizations and UX — 2022 – Present
Siemens AG — Lisbon, Portugal

- Leading strategic roadmap and agile delivery for enterprise Data & AI platforms (Airflow, Qlik Cloud, Anaplan, SAP Analytics Cloud).
- Spearheading **AI & MCP integrations**, managing global cross-functional squads, and executing SaaS migrations.
- Owning budget, procurement, and ROI-driven investment decisions for global analytics tools.
- Bridging the gap between technical teams and business leadership, translating complex data requirements into actionable project roadmaps.

Data Solution Expert | AI & Analytics — 2016 – 2022
Siemens AG — Alfragide, Portugal

- Delivered enterprise BI solutions as technical lead for Qlik-based platforms.
- Engineered performance improvements for on-prem analytics, reducing load times and enhancing user experience.
- Maintained high-availability environments ensuring data integrity and system reliability.
- Collaborated with stakeholders to translate business needs into technical specifications.

IT Systems Administrator — 2013 – 2016
Construção Publica E.P.E — Lisbon, Portugal

- Maintained IT infrastructure and system security, resolving incidents and performing upgrades.

IT Helpdesk Technician — 2012 – 2013
EDNI Lda — Lisbon, Portugal

- Delivered first-line support, logging and tracking technical incidents.

Hardware Technician — 2011 – 2012
DECSIS — Alfragide, Portugal

- Diagnosed and replaced faulty components, ensuring operational efficiency.
